GADDAM SASIKALA

AI Engineer | Agentic Systems & RAG | Enterprise Automation | UI/UX

West Godavari, India • +91 8247538393 • sasikala.gaddam24@sasi.ac.in • linkedin.com/in/gaddam-sasikala-bb1b13326 • github.com/LuminaQuest

PROFILE

B.Tech Computer Science student who builds production-grade AI systems — multi-agent swarms, RAG pipelines, and enterprise automation workflows — with guardrails, evaluations, and deployment architectures that enterprises require. **National Finalist in the OpenAI Academy × NxtWave GenAI Buildathon**. Combines AI engineering with UI/UX excellence, delivering intelligent, reliable, and high-impact applications. Open to paid internships, remote AI engineering roles, and high-value project engagements.

FEATURED PROJECTS

Digital Krishi Officer — Multilingual GenAI Agricultural Assistant

🏆 **National Finalist (OpenAI Academy Buildathon)**

- Architected an AI-driven multilingual assistant empowering Indian farmers with real-time crop disease diagnosis, dynamic localized weather forecasting, and government agricultural scheme navigation in vernacular languages and local slang.
- Engineered vernacular voice-to-text and localized LLM reasoning pipelines; secured State Finalist and selected for the National Finale in India's biggest GenAI buildathon.

AURA // NEXUS — Autonomous Spatial Agentic OS & Automation Fabric

github.com/LuminaQuest/aura-nexus | luminaquest.github.io/aura-nexus

- Engineered an autonomous multi-agent operating system unifying LangGraph supervisors, Tree-of-Thought speculative reasoning, and an interactive 3D WebGL synapse canvas with real-time telemetry dials.
- Built an enterprise automation fabric integrating bi-directional n8n webhooks, Zapier REST event dispatchers, Model Context Protocol (MCP) tool execution, and dynamic model routing (Gemini Pro/Flash, saving 68% token costs).

Multi-Agent RAG Assistant with Evals & Guardrails

github.com/LuminaQuest/multi-agent-rag-assistant | onrender.com

- Designed a LangGraph supervisor system routing tasks to specialized agents with explicit control loops, retry logic, and iteration caps; built ChromaDB RAG pipeline with cross-encoder reranked retrieval and session memory.
- Integrated multi-provider model routing, input/output guardrails, human-in-the-loop approvals, and offline eval suites; containerized with Docker and deployed via FastAPI on Render.

SMS-Guard: Multilingual Indic Regional Phishing Detection AI

github.com/LuminaQuest/phishing-sms-regional-app

- Developed a real-time cybersecurity NLP model detecting financial phishing and smishing attacks across Indic languages (Telugu, Hindi, Tamil) with sub-50ms inference, effectively handling code-mixed vernacular text.

CORE SKILLS

Generative AI & LLMs	Prompt engineering, multi-provider model routing, LLM evaluation, structured outputs, OpenAI APIs
Agentic AI	LangGraph, LangChain, supervisor/worker multi-agent design, Tree-of-Thought (ToT), control loops, human-in-the-loop
RAG & Vector Search	Chunking, embeddings, ChromaDB, dense + BM25 hybrid search, cross-encoder reranking, grounded retrieval
Enterprise Automation	n8n workflow automation, bi-directional webhooks, Zapier REST integration, Model Context Protocol (MCP)
Safety & Engineering	Input/output guardrails, offline evaluation suites, Python, FastAPI, Docker, Git/GitHub, structured logging
Design & Front-End	UI/UX design, Figma, responsive web interfaces, Three.js / WebGL spatial 3D interfaces, Spline 3D, HTML5, CSS3

EDUCATION

B.Tech, Computer Science — Sasi Institute of Technology and Engineering 2024 – 2028

Intermediate (MPC) — Sri Chaitanya Junior College | CGPA 8.3 2022 – 2024

HONORS & CERTIFICATIONS

- **National Finalist** — OpenAI Academy × NxtWave GENAI Buildathon (India's Biggest GenAI Buildathon) for *Digital Krishi Officer*
- **Build Your Own Responsive Website** (ID: MWILVCMRQ) & **Build Your Own Static Website** (ID: YNZEGFBUKM) — NxtWave CCBP 4.0
- **Intern, CodeAlpha** — Completed web and software development internship
- **Languages:** Telugu (Native) • English (Proficient) • Italian (Beginner)
